Stellantis &You Launches Smart AI Inspections for Used Car Valuations

Oxford, UK – June 2025 – Stellantis &You, the UK dealer network owned by Stellantis, has announced the integration of AI vehicle inspection for part exchange valuations.

Stellantis &You associates across all 28 UK dealer locations can now self-inspect vehicles using Tchek's advanced AI damage inspection technology, following close collaboration with UK-based AI solution provider TyreSwift.

The AI web-app, seamlessly embedded in the Stellantis platform, captures a series of images of the vehicle via a guided walkaround using a smartphone. Image quality and user feedback is provided in real time prior to a full external damage analysis. Detailed reports provide improved damage detection and valuation accuracy.

The enhanced part exchange process allows vehicle inspections to be carried out on site by Stellantis &You associates but also off site by private sellers. This ensures precise vehicle condition assessments are made as early as possible, reducing the risk of unexpected damage discoveries later in the transaction process.

David Male, Head of Transformation - Stellantis &You, commented, "The integration of Tchek's AI into our part exchange platform has great benefits for our customers and our sales and service teams. Valuations are more accurate, and we can speed up processes. Our customers can also use the webapp to take the images on their own phone and receive a valuation before the vehicle is brought to one of our locations." Conor Power, Digital Process Improvement Manager – Stellantis &You, added, "The support from TyreSwift and directly from Tchek made for a smooth integration process. The flow was customised for our needs and operates seamlessly within our own platform.

Andy Pryce, Managing Director of TyreSwift, added, "It's exciting to see this successful deployment of an AI inspection solution by Stellantis &You, a leading UK dealer group. It highlights how inspection AI has matured and now delivers significant customer value in terms of reduced errors, improved process efficiency and enhanced customer satisfaction. We look forward to expanding our partnership and introducing more advanced AI-driven features."

Tchek CEO Anton Fert added, "Tchek confirms its leading position in vehicle inspection powered by AI through this new partnership with Stellantis &You, which leads the way by combining both remote and on-site inspections to bring greater efficiency to internal processes and better customer satisfaction."

About Stellantis &You

Stellantis &You UK, formerly Robins & Day, part of the Stellantis' European retail division, is one of the largest dealer groups in the UK, with locations nationwide offering new cars, used cars and aftersales facilities. With 28 locations nationwide featuring dedicated sales showrooms, workshops and 5 Distrigo parts hubs, the business offers the latest new cars from Abarth, Alfa Romeo, Citroën, DS, Fiat, Jeep, Leapmotor, Peugeot and Vauxhall, plus stock of thousands of manufacturer-approved used vehicles from all major manufacturers.

About TyreSwift

TyreSwift is a leading AI-inspection solutions provider to the automotive aftermarket. TyreSwift AI solutions automate tyre, alignment, and body damage inspection. Through strategic partnerships with leading testing equipment manufacturers and AI-assisted digital inspection system developers, TyreSwift offers a comprehensive range of drive-over, drive-through, and digital smartphone inspection and reporting solutions. These are integrated with TyreSwift's cloud-based software on a unified platform, offering further integration capabilities with eVHC, DMS or CRM software.
